

SONY

PXW-Z750

Production powerhouse.

ENG-style ergonomics with cinema-quality HDR performance.

The ergonomic PXW-Z750 brings unrivaled image quality for content creators producing reality TV, documentaries, news, wildlife, nature, sports production, and more. A newly developed 3-chip 2/3" global shutter 4K CMOS image sensor delivers rich artifact-free images with added versatility for a wide range of 2/3" lenses and provides the foundation for superior HDR image-making capability. The PXW-Z750's latest generation XAVC-L422 QFHD 200 codec combined with high-speed SxS Pro media radically reduces real-world turnaround times, saving valuable time and money.

The PXW-Z750 offers 4K resolution, high contrast and sensitivity, and low signal to noise – ideal for HDR productions where highlight and shadow subtleties are crucial. In sports and entertainment,

the shoulder-mount ENG camcorder matches our latest generation of System Cameras, as the PXW-Z750 utilizes the same imager technologies.

Designed based on user feedback and technical innovation, the lightweight PXW-Z750 offers instinctive familiarity and balances comfortably and confidently on the operator's shoulder. Its instantly recognizable and ergonomic layout accounts for external controls being in all the right places. With added flexibility, the PXW-Z750 is compatible with many existing lenses, batteries, chargers, adaptors, microphones, and other accessories that readily mount to the camera and are already in the videographer's kit bag. This camcorder is so versatile for many different applications that naturally, it's a logical selection to be your go-to camcorder.

Discover the benefits of our PXW-Z750 camcorder.

Key Features & Benefits

Native 4K Imager

Three independent 4K sensors deliver images with extraordinary dynamic range, wide color gamut, and low-noise F12 sensitivity.

Global Shutter Technology

Eliminates flash-banding artifacts and distortion of fast-moving objects associated with rolling shutter sensors, allowing you to shoot with confidence when LED lighting and other uncertain lighting conditions are present.

Ready for Anything

From long zoom to near cinematic shallow DOF, the Z750 is the all-in-one tool for any occasion.

Classic ENG Design

The instinctive familiarity and muscle memory of a lightweight camcorder balances comfortably and confidently on the shoulder, recognizing the same external controls in all the right places.

HDR for any Application

The Z750 offers two different HDR shooting modes: S-Log3, to capture the widest dynamic range as produced by the sensors; and Hybrid Log Gamma (HLG), perfect for day-to-day shooting, viewing, editing, and broadcast workflows.

Simultaneous 4K + HD Recording

The Z750 supports simultaneous recording of QFHD XAVC™ and Full HD XAVC/MPEG HD 422 files, as well as HDR and SDR onto a single SxS® card.*

Wireless Streaming and File Transfer

Equipped with powerful networking capabilities, including advanced live streaming and FTP transfer of full-res files and proxies. The supplied Wi-Fi® module and Ethernet Connection enable remote control of the Z750 over Wi-Fi using the Content Browser Mobile app (compatible with iOS® and Android® devices).
